

WEATHER SYMBOLS

What do they mean?

CLOUD COLOUR

WHITE = light cloud

BLACK = heavy / low cloud

(precipitation is normally shown falling from a **BLACK** cloud)

(WHITE cloud can also be shown in **GREY** so it can be seen on a white background!)

SUN / MOON

= 'showers'

A half sun behind a black cloud means 'SHOWERS'. Showers are usually shorter, localised bursts, with clear spells between.

This moon symbol also means 'SHOWERS'. (It doesn't mean 'night-time'!)

PRECIPITATION

Number of drops (rain, snow, hail)

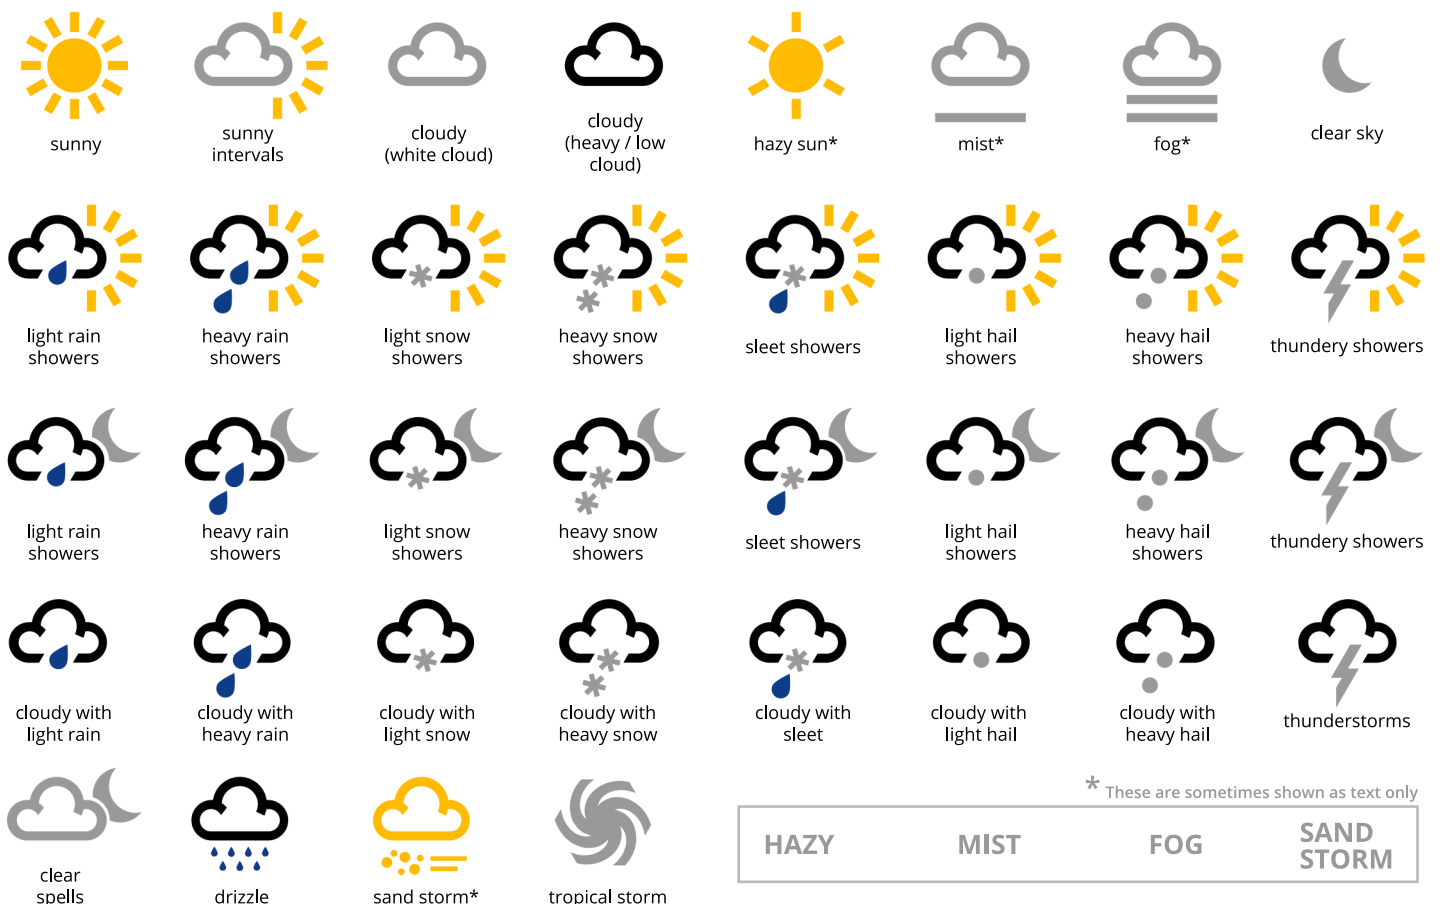

1 = light

2 = heavy

(occasionally 3 = extreme!)

these can appear below the cloud

* These are sometimes shown as text only

HAZY

MIST

FOG

SAND STORM
